School Libraries, School Planning

**Abstract**

The outpouring of new instructional materials and techniques has resulted in a demand for instructional materials centers at the elementary school level. This handbook has been published to assist in planning and developing such a facility. The media center's usefulness to students, teachers, and administrators is outlined. The qualifications and job descriptions of the professional staff are set forth, along with a list of necessary supportive staff. It is pointed out that the quarters for a media center should be centrally located to students and teachers. Guidelines are laid down for the acquisition of an adequate supply of books, magazines, and other materials needed for both student and teacher use; the equipment necessary for the display and use of the materials is listed. An annual budget is proposed to provide sufficient funds to cover the costs of maintenance. Since there will be some material the teacher will want to develop himself, equipment necessary for such production is suggested. Standard library furnishings are suggested; specifications (height, width, depth, etc.) for various items are noted. A 3-phase program for each aspect of the center's development is outlined. A bibliography supplements the report. (JY)

ED 033588

“... guidelines for  
development of K-6 media  
centers or libraries in  
Iowa's schools.”

## **Members of the Handbook Committee**

### **Preface**

This handbook has been prepared by a special committee composed of administrators, librarians, and audiovisual specialists under the direction of Betty Jo Buckingham, library consultant for the Department of Public Instruction. Its purpose is to establish guidelines for the development of elementary K-6 media centers or libraries in the schools of Iowa.

A broad concept of services, personnel, equipment, materials, physical facilities, and school-community coordination has been outlined. Since this publication could not be designed as a detailed manual for administering a library or combined library-audiovisual program, the bibliography lists books and periodicals that will be helpful in planning, developing, and administering a media center. Each school should purchase a copy of *Standards for School Media Programs*, prepared jointly by the American Library Association and the Department of Audiovisual Instruction of the National Education Association as a more specific guide in this area.

## Introduction

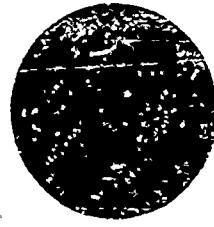

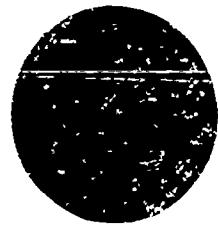

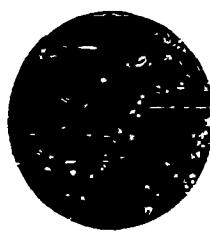

“... making learning more interesting and teaching more effective.”

The tremendous increase in knowledge, the changes in learning theory, the advancement of technology, and the changing curricular patterns, have made reassessment of present library and audiovisual practices at the elementary school level imperative. Making learning more interesting and making teaching more effective requires flexibility which can be achieved only through the use of many kinds of materials and techniques. Effective use of materials and techniques has resulted in a demand for media centers at the elementary school level; therefore, this handbook is being published to assist in planning and developing these facilities. The quantitative guidelines have been arranged in three phases to enable Iowa schools to develop both short and long-range goals to provide a learning center in every elementary school building. It is recommended that not more than three years should be allowed to achieve each of the three phases.

The term *media center* is used throughout this handbook to designate a centralized collection of materials and service with a staff of professional personnel working closely with teachers and administrators. There are many other terms for such a center; for example, library, cross-media center, media library, instructional material center, library/instructional materials center, learning resource center, and multi-media center. Regardless of the terminology used, all elementary schools in Iowa are urged to meet the standards set forth in this handbook.

## The Media Center . . .

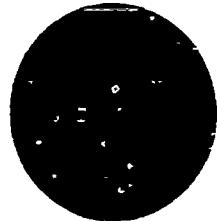

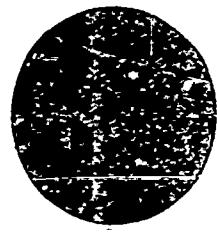

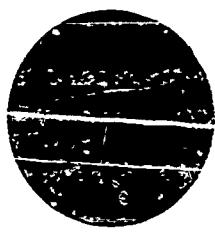

### **serves children by:**

- Indicating all learning materials (print and non-print\*) that are available in the building
- Teaching how to locate and use materials
- Teaching how to evaluate materials
- Providing an atmosphere for individual and small group inquiry
- Teaching how to relate to outside sources for additional information
- Developing skills in the production of learning materials
- Encouraging creativity
- Giving increased dimensions to learning through access to a variety of media
- Providing materials of varying levels of difficulty and on a wide variety of subjects

\*Print and non-print materials include books, magazines, filmstrips, records, tapes, films, pictures, games and other learning materials not considered as classroom texts.

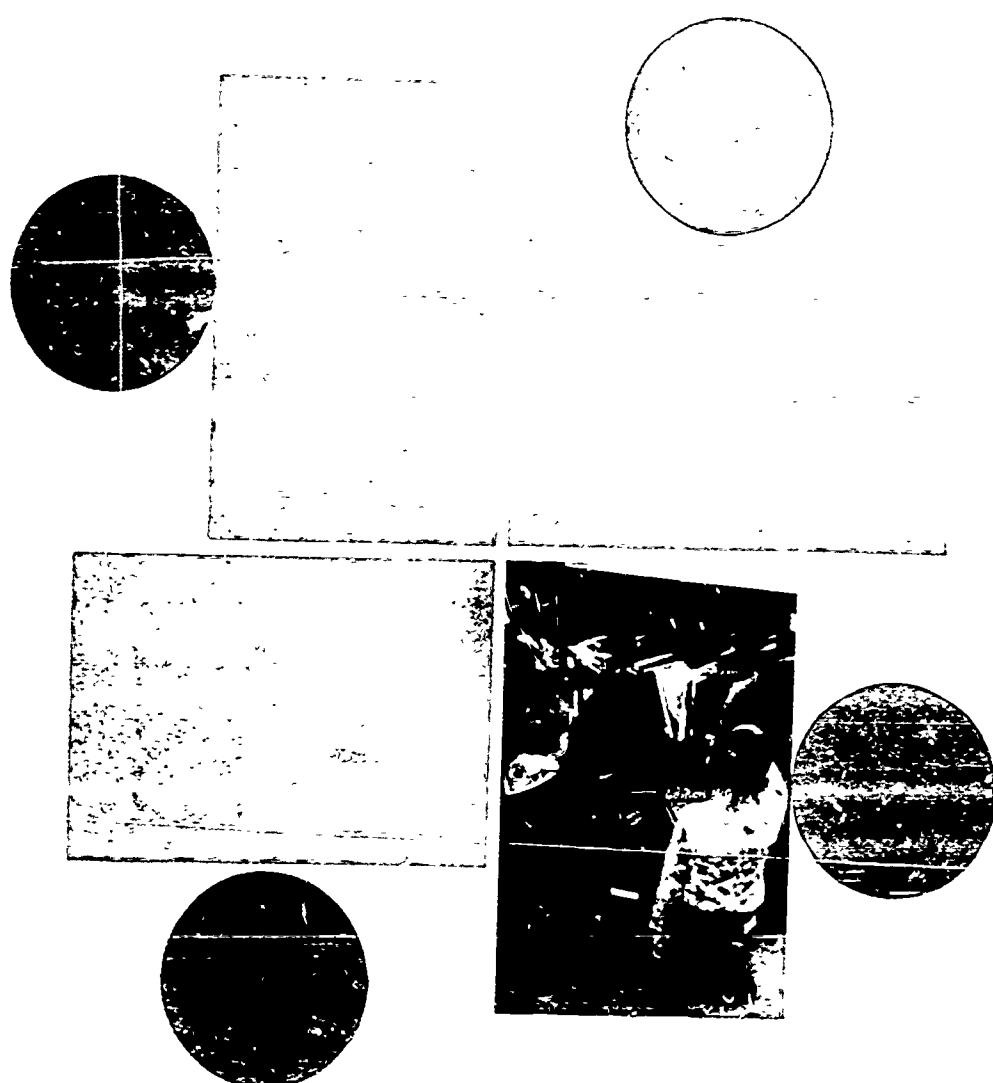

## The Media Center . . .

### **serves teachers by:**

- Cataloging all instructional materials that are available in the building
- Providing a professional library
- Assisting in selection and accumulation of materials for a unit
- Assisting in the planning and production of various teaching materials
- Providing information on available outside resources
- Aiding in correlation of unit materials and activities
- Providing information on new materials and techniques
- Providing inservice training including methods of using and evaluating materials and evaluating techniques
- Providing examination and previewing facilities
- Scheduling materials and equipment for maximum use

## The Media Center . . .

### **assists administrators by:**

- Providing central purchasing of learning materials and equipment
- Maintaining a constant and complete inventory of all learning materials and equipment
- Providing inservice training
- Avoiding needless duplication of learning materials
- Providing a central collection of statistical data, area facts, buying guides, and other pertinent information
- Relating with other libraries in the area
- Providing examination and previewing facilities
- Maintaining circulation-utilization records
- Providing central distribution of materials and equipment
- Supporting the total school curriculum
- Providing continuous orientation to new ideas
- Simplifying maintenance of equipment
- Providing a centralized area for production of instructional materials

# Staff

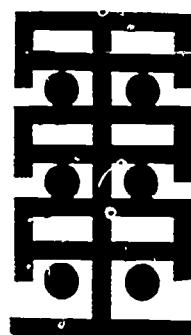

**"The professional person initiates services which change a room full of materials into a well-functioning center of learning."**

An adequate qualified staff is necessary if a media center is to become an integral part of the school. The staff should include both professional and supportive personnel. A job description should be written to define the details of each position in every school district.

## Professional Staff

The professional person is one of the most vital components of a media center. He initiates the services which change a room full of materials into a well-functioning center of learning. He provides guidance in the selection of materials to be used and purchased; organizes the materials, equipment, and space for maximum use; provides instruction in the use of the center and its contents; aids teachers in planning and preparing materials for their individual class use; serves on curriculum and textbook committees as a materials specialist; and helps organize inservice training for teachers. He should enjoy working with children and be capable of working with a wide variety of adults.

The first professional staff member should be a media generalist trained in both the library and the audiovisual fields, having the

same general educational background as other teachers. He should be certificated by the Department of Public Instruction.

When an additional professional person is added to the staff, the second person's training and background should strengthen and complement the first professional's training and background. One of the professionals should be designated as head of the center.

## Supportive Staff

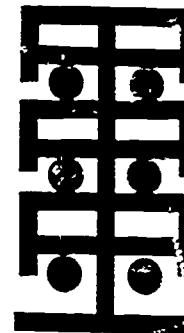

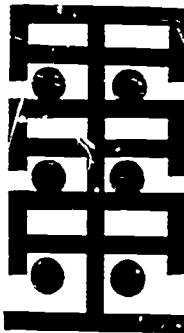

Non-professionals supply supportive services, freeing the professional staff from clerical and mechanical tasks. Two broad classifications of supportive personnel are clerks and technicians.

Clerks can perform the following tasks:

1. Typing
2. Keeping records
3. Sending notices
4. Opening mail
5. Handling office and circulation routines
6. Reading shelves
7. Shelving and filing materials
8. Inspecting and repairing films
9. Mounting pictures and transparencies
10. Maintaining appearance of center
11. Repairing of minor damage of print materials

The training of a clerk is done primarily on the job, but office experience and typing skill are prerequisites.

Technicians are supportive personnel who have special training in the fields of graphics, information and materials processing, television, photography, or media production methods. The services to be offered by the media center will determine the type of technicians needed. Technicians may or may not be certificated personnel.

## Phase I

## Phase II

## Phase III

### Professional Staff

(Phases or goals to attain by the end of successive three year periods)

1-499 pupils - 1 professional person\*

500-749 pupils - 1½ professional persons

750-999 pupils - 2 professional persons

1,000-1,499 pupils - 2½ professional persons

Teaching certificate with appropriate endorsement

1-399 pupils - 1 professional person

1 additional professional person for each additional 400 pupils or major fraction thereof

Teaching certificate with appropriate endorsement

1-249 pupils - 1 professional person

1 additional professional person for each additional 250 pupils or major fraction thereof

Teaching certificate with appropriate endorsement

(Head professional should have a master's degree in library science and audiovisual education)

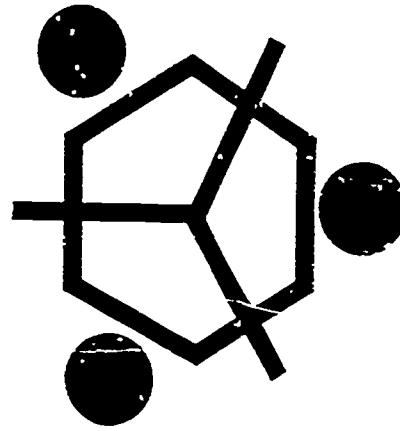

\*This professional person may serve half-time in two different media centers if the schools involved do not have a combined enrollment over 499.

School districts with several elementary school attendance centers may find it advantageous to employ a media center coordinator for the district.

**Supportive Staff** One non-professional person for each professional staff member.....

## Quarters and Facilities

*"... a wide variety of activities will take place in the media center..."*

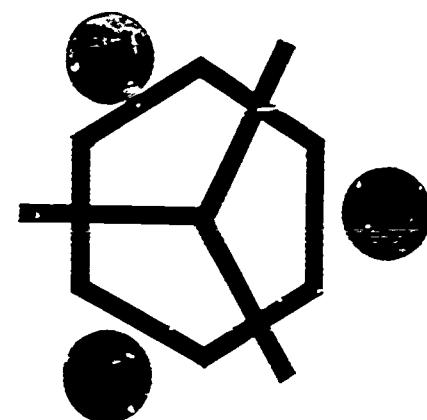

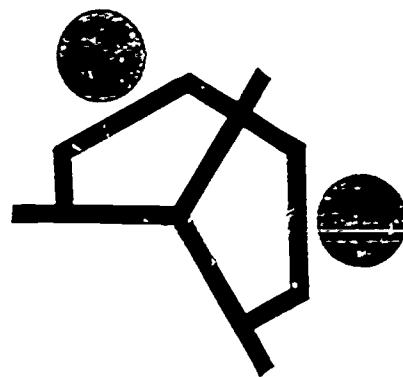

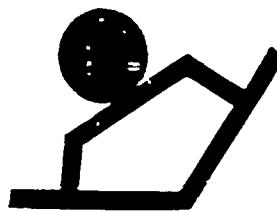

The location of the media center will vary according to existing facilities, but it should be as centrally located as possible to provide maximum accessibility to students and teachers. Whether the media center is in an existing building or planned in a new structure, consideration should be given to future expansion as the enrollment and program may demand. It is vital that professional media consultative services be obtained from a college or university, the Department of Public Instruction, or exemplary school systems before educational specifications are submitted to an architect.

The media center should be an attractive facility which children and teachers enjoy using. Since a wide variety of activities will take place in a media center, several areas should be kept in mind:

1. Study area to include space for reading, browsing, listening, and viewing by individuals, small groups, and large groups (Allow 40 sq. ft. per student)
2. Office area for professional personnel
3. Work area for cataloging and processing new materials and for maintaining present materials and equipment
4. Production area to accommodate materials and equipment needed for production of instructional materials
5. Faculty area including professional collection and conference facilities
6. Storage area with space for shelving magazines and other materials
7. Storage area for equipment

The electrical system should be designed to provide effective lighting in each activity area, adequate light control for many types of viewing activities, and an adequate number of electrical outlets in all areas. At least one telephone outlet should be located in the office area. Light switches, electrical outlets, fire extinguishers, telephones, and thermostats should be located so they do not take up space needed for shelving or storage. Movable, counter-height shelving permits flexibility in arrangement and allows the floor space to be used in a variety of ways. The floor and ceiling should be acoustically treated for noise control.

## Phase I \_\_\_\_\_

All materials, print and non-print, centrally cataloged

Central room furnished and equipped to house as much of the program as possible, preferably with space available to seat the largest class plus ten

Storage space provided

Professional collection housed somewhere within the building

Production area provided

## Phase II \_\_\_\_\_

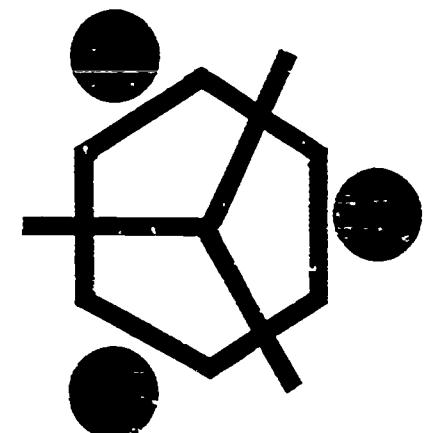

Print and non-print materials combined into an integrated media center program

Remodeled quarters or new facilities planned to meet the needs of the materials collection and program of services in a combined media-library program, including:

1. Space to seat 40 students plus 5% of the school enrollment in the reading area
2. Office and workroom
3. Magazine and audiovisual storage
4. Previewing and listening area
5. Conference room
6. Production area
7. Professional collection area
8. Provisions for expansion

## Phase III \_\_\_\_\_

Quarters expanded to provide a program of superior service as set forth in the joint American Library Association and Department of Audiovisual Instruction's *Standards for School Media Programs*.

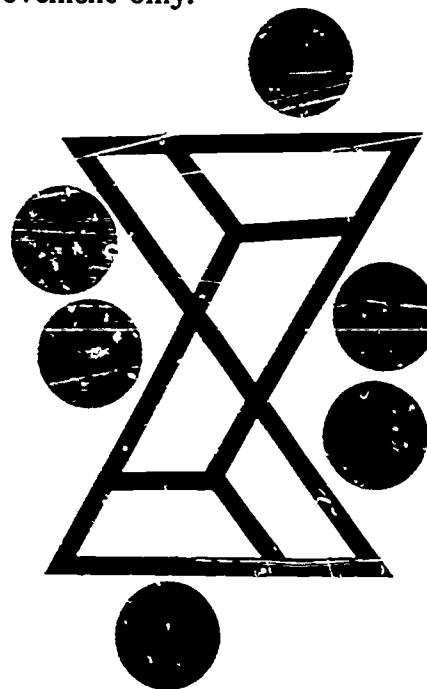

## Materials Collection

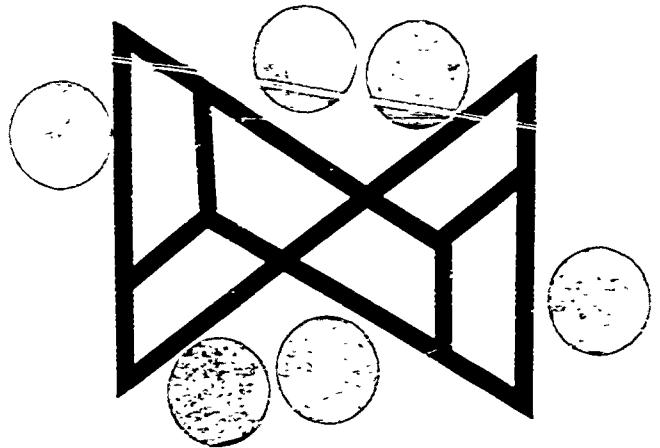

12

A balanced, up-to-date collection of materials, is essential to a media center even in its beginning stage. These materials should be carefully selected by a media professional working closely with teachers and consulting authoritative selection aids to determine the quality of the materials. The collection should be tailored to the needs of the pupils and to the curriculum of each school. Constant evaluation of materials by all users will result in a highly effective and qualitative collection.

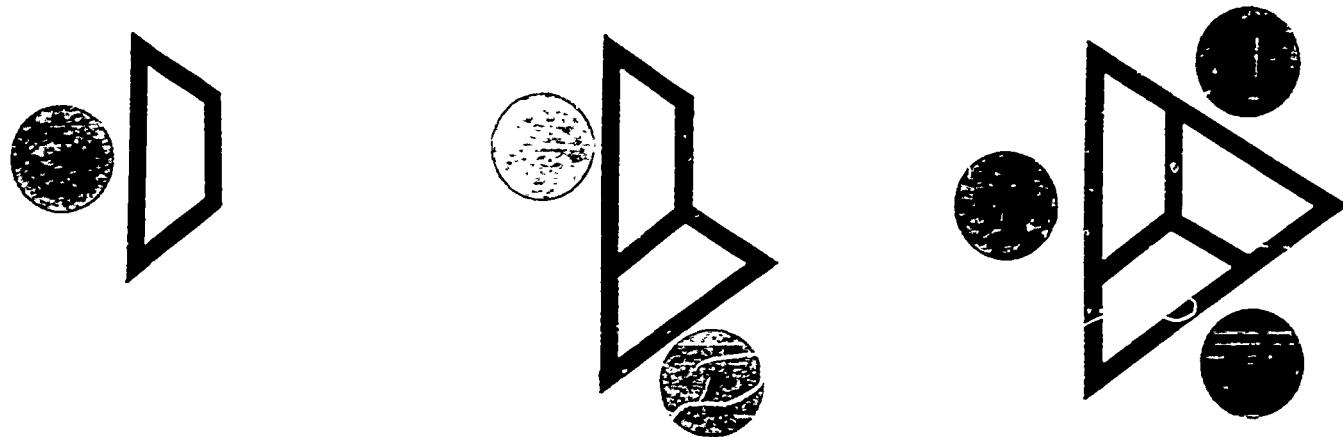

An annual budgetary allowance should be provided by the school district to maintain and improve the collection. Sufficient quantities of materials and equipment to meet each phase requirement should be purchased through capital outlay. The normal annual budgetary allowance for instruction provides for maintenance and improvement only.

## Phase I    Phase II    Phase III

<b>Books</b>	At least 6,000 volumes representing 6,000 titles or 10 books per pupil, whichever is greater	8,000 volumes representing at least 6,000 titles, or 12 books per pupil, whichever is greater; duplicates as needed to support school curriculum and supply student interests	10,000 volumes representing at least 8,000 titles or 15 books per pupil, whichever is greater; duplicates as needed to support school curriculum and supply student interests
<b>Magazines</b>	15 - 24 titles	25 - 39 titles	40 - 50 titles
<b>Newspapers</b>	3 titles	4 titles	6 titles
	Vertical file materials (pamphlets, pictures, booklets, charts, clippings) in abundant supply .....		
<b>16mm Films</b>	Ready access to a minimum of 3,000 titles supplemented by duplicates and rentals .....		
<b>Filmstrips</b>	500 titles or 1 per pupil, whichever is greater	750 titles, representing 1,000 prints or 2 prints per pupil, whichever is greater	1,000 titles, representing 1,500 prints or 3 prints per pupil, whichever is greater
<b>Recordings</b> (Discs & Tapes) (Excluding electronic laboratory materials)	1,000 titles or 2 per pupil, whichever is greater	1,500 titles or 4 per pupil, whichever is greater; duplicates as needed to support school curriculum and supply student interests	2,000 titles or 6 per pupil, whichever is greater; duplicates as needed to support school curriculum and supply student interests

## Phase I    Phase II    Phase III

<b>8mm film loops (single concept)</b>	No specific recommendation <sup>1</sup>	250 titles	500 titles, supplemented by duplicates
<b>Globes</b>	1 per teaching station plus 2 for media center	Additional special globes as needed	Additional globes as needed
<b>Maps</b>	Sufficient quantity and variety to meet the needs of the curriculum; may be in various formats, such as transparencies, flat, and wall maps, and must be up to date; number of duplicates will be determined by the number of sections of a particular grade .....		
<b>Transparencies and slides</b>	Sufficient quantity to meet the needs of the school curriculum .....		
<b>Pictures</b>	Sufficient quantity and wide variety sturdily mounted to meet the needs of the school curriculum .....		
<b>Study print sets</b>	100 sets or 1 for every 5 pupils, whichever is greater; additional and duplicates as needed to satisfy classroom needs	175 sets or 1 for every 3 pupils, whichever is greater; additional and duplicates as needed to satisfy classroom needs	225 sets or 1 for every 2 pupils, whichever is greater; additional and duplicates as needed to satisfy classroom needs
<b>Art prints (Reproductions in color of art works)</b>	300	600	1,000

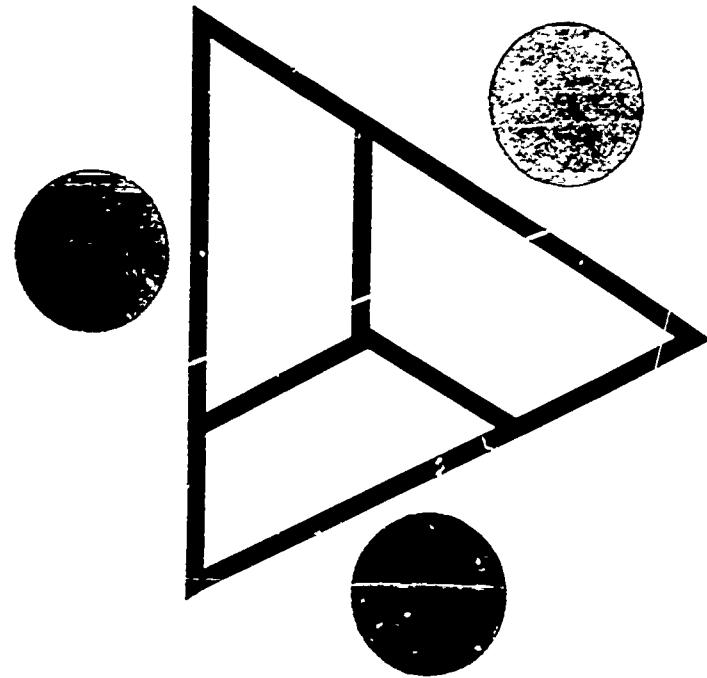

<sup>1</sup>Introduce a variety of materials in this area on an experimental basis.

<b>Replicas and art objects</b>	Sufficient quantity to meet the needs of the school curriculum .....
<b>Models, kits, realia, and dioramas</b>	Sufficient quantity to meet the needs of the school curriculum .....
<b>Programmed instruction</b>	No specific recommendations <sup>2</sup> .....
<b>Microform</b>	No specific recommendations <sup>2</sup> .....
<b>Videotape</b>	No specific recommendations <sup>2</sup> .....
<b>Dial access</b>	No specific recommendations <sup>2</sup> .....

<sup>2</sup> Introduce these facilities on an experimental basis and expand the ones which are suitable to the school's situation as determined by the school staff and administration.

## Professional Collection

A professional library is a necessity. A central collection of print and non-print materials should be housed in each building and be easily accessible to all staff members. The building collection should emphasize current materials and basic reference tools while the district collection would contain such items as examination copies of textbooks and specialized materials in various fields of education.

Materials to include in a building professional collection.

- Professional books and magazines
- Courses of study and curriculum guides
- Community resources guides
- Textbooks and teachers' manuals for basic and supplementary materials used within the system
- Films, filmstrips, recordings, and other non-print materials
- Pamphlets
- Information and announcements of workshops, college courses, institutes, etc., for continuing education
- Professional organizations' newsletters, meeting announcements, and miscellaneous releases
- Government documents

An annual budgetary allocation will provide for an adequate collection and for keeping it up to date. Faculty members should be consulted for recommendations of materials to include.

### Phase I

200 - 600 books (titles)

10 - 29 magazines

Audiovisual materials, pamphlets, etc., as needed

### Phase II

600 - 1,000 books (titles)

30 - 49 magazines

Audiovisual materials, pamphlets, etc., as needed

### Phase III

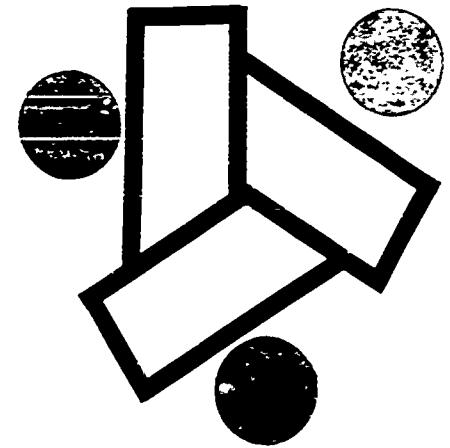

1,000 books (titles) and more as needed

50 or more magazines

Audiovisual materials, pamphlets, etc., as needed

## Budget

An annual budgetary allocation is necessary to maintain a collection of materials and equipment in a media center. Additional funds should be appropriated for building the collection and for providing the equipment needed to reach each phase.

### Phase I      Phase II      Phase III

#### Materials

3 per cent of the current national per pupil cost\* (including operational costs) as per pupil expenditure to maintain the collection; sufficient capital outlay to reach Phase I

5 per cent of the current national per pupil cost\* (including operational costs) as per pupil expenditure to maintain the collection; sufficient capital outlay to reach Phase II

6 per cent of the current national per pupil cost\* (including operational costs) as per pupil expenditure to maintain the collection; sufficient capital outlay to reach Phase III

#### Equipment

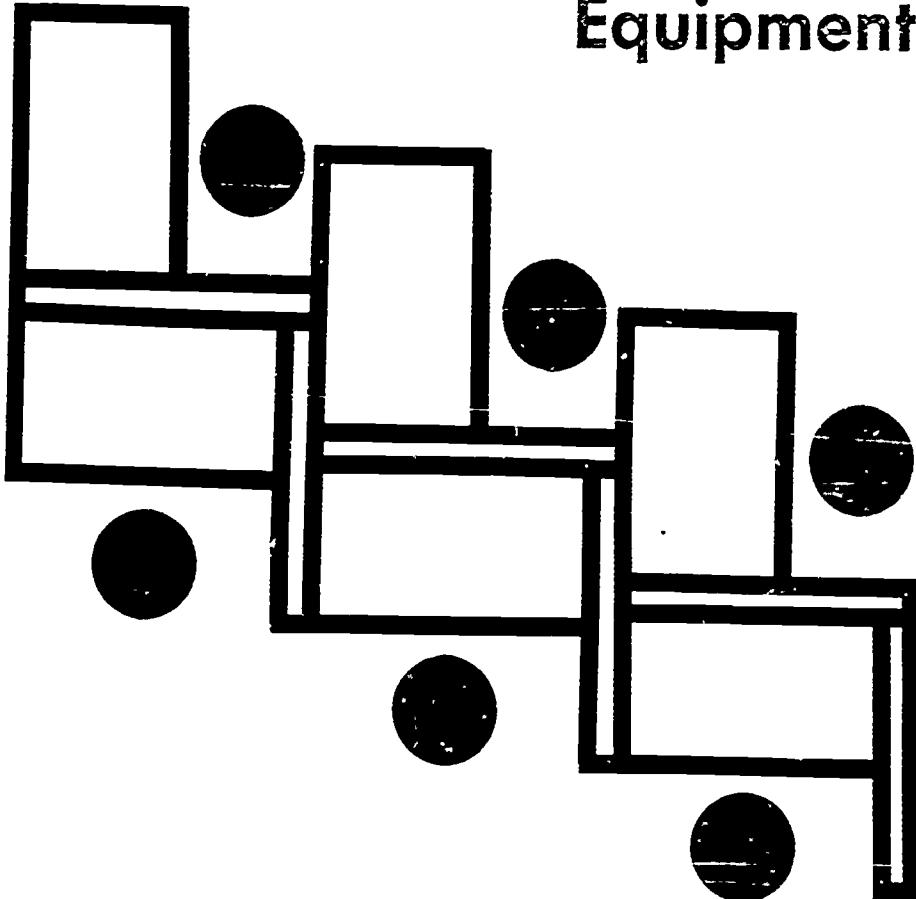

Sufficient capital outlay per year to provide for reaching the goals of each phase .....

#### Supplies

Sufficient yearly allocations to provide adequate quantities of supplies to handle all materials and equipment.....

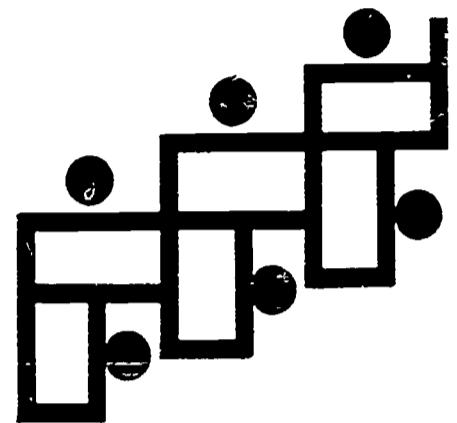

\*The 1968-69 national average per pupil expenditure was \$680 as stated in *Estimates of School Statistics, 1968-1969* (Research Report 1468-R16), National Education Association, Washington, D.C., 1968, p. 20.

## Equipment

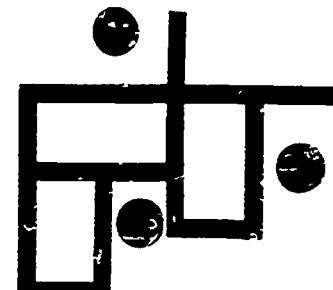

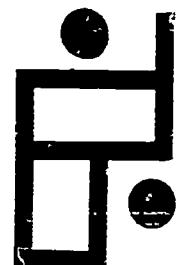

Several factors such as central distribution, the number of floors in a building, an elevator in multi-level buildings and closed-circuit devices, may affect the amount of audiovisual equipment needed by a school. In the case of closed-circuit devices, plans must be made so that the individual classroom will receive the service it needs at the appropriate time.

A carefully planned program will provide for optimum use of equipment presently available and, at the same time, allow sufficient flexibility to make use of innovations as soon as they have demonstrated their worth in the improvement of instruction. The equipment listed below, therefore, is merely a minimum recommendation, and schools should feel free to expand in those areas where their particular needs are greatest.

## Phase I \_\_\_\_\_ Phase II \_\_\_\_\_ Phase III \_\_\_\_\_

<b>16mm projectors</b>	1 per 10 teaching stations or 1 per floor plus 1 in media center	1 per 4 teaching stations plus 2 in media center	1 per 2 teaching stations plus 5 in media center
<b>8mm projectors</b>			1 per building
<b>8mm loop projectors, (if materials are available)</b>	5 per center	1 per 3 teaching stations plus 15	1 per teaching station plus 15
<b>2x2 slide projectors, remotely controlled</b>	1 per building	1 per 5 teaching stations plus 2	1 per 3 teaching stations plus 5
<b>Filmstrip or combination filmstrip-slide projectors</b>	1 per 10 teaching stations plus 1	1 per 5 teaching stations plus 1	1 per teaching station plus 4
<b>Sound filmstrip projectors</b>	Combine available filmstrip projector with record player or tape recorder	1 per 10 teaching stations plus 1	1 per 5 teaching stations plus 2
<b>10x10 overhead projectors</b>	1 per 2 teaching stations plus 1	1 per teaching station plus 2	1 per teaching station plus 4

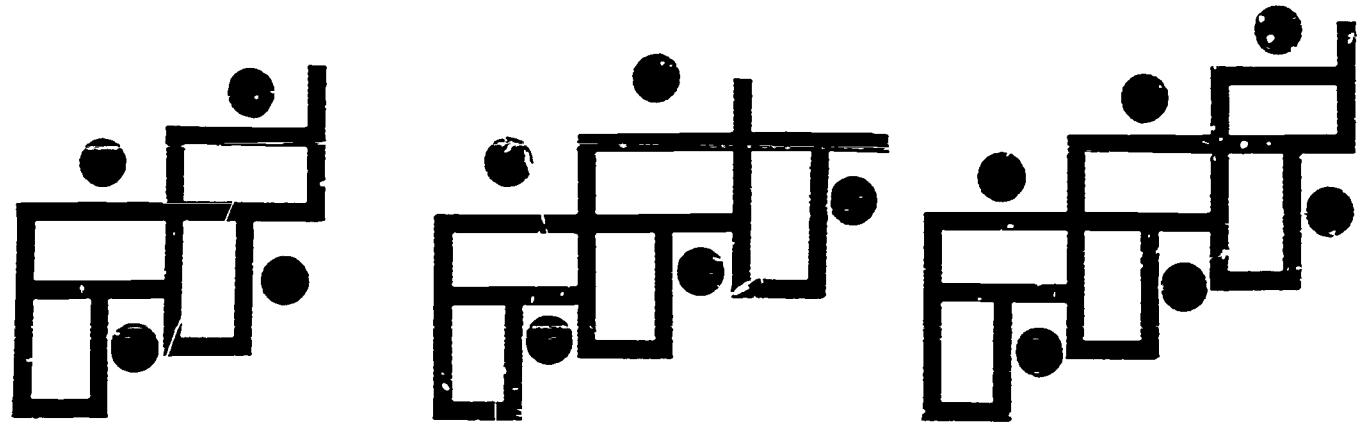

## Phase I

## Phase II

## Phase III

<b>Opaque projectors</b>	1 per floor	1 per 25 teaching stations plus 1 per floor	1 per 15 teaching stations
<b>Filmstrip viewers</b>	1 per 2 teaching stations in media center	1 per teaching station plus 1 per 2 teaching stations in media center	3 per teaching station plus 1 per teaching station in media center
<b>2x2 slide viewers</b>	1 in media center	1 per 5 teaching stations plus 1	1 per 24 pupils plus 1
<b>TV, minimum 23-inch screen</b>	1 per floor on cart and classrooms equipped with antenna lead-in	1 per teaching station where programs available	1 per 24 pupils plus 1
<b>Micro-projectors</b>	1 per building	1 per 20 teaching stations	1 per 2 grade levels
<b>Record players</b>	1 per teaching station (K-1), 1 per 2 teaching stations (2-3), 1 per grade level (4-6) plus stereo record player in media center	1 per teaching station (K-3), 1 per grade level (4-6) plus stereo record player	1 per teaching station (K-6) plus 5, and stereo record player
<b>Audio tape recorders</b> equipped for case with earphones	1 per 7 teaching stations plus 1	1 per 2 teaching stations plus 2	1 per teaching station plus 10
<b>Projection carts</b>	1 per portable piece of equipment, purchased at the time the equipment is obtained, and equipped with power cord		

### Phase I

**Listening stations** 1 per floor plus 1

### Phase II

Portable listening station with 6-10 sets of earphones at a ratio of 1 per 3 teaching stations (suitable for use with record player or tape recorder)

### Phase III

Same as Phase II, but 1 per teaching station plus 1

#### **Closed circuit television**

All new construction and major modification of buildings should include provisions for installation at each teaching station and the media center .....

#### **Projection screens**

1 permanently mounted screen per classroom plus portable screens as needed—no smaller than 70x70 with keystone eliminator .....

#### **Radio receivers**

1 per media center 1 per media center plus central distribution—AM-FM 3 per media center plus central distribution—AM-FM

#### **Micro-recorders**

As materials become available 1 per 10 teaching stations to be located in media center 1 per 5 teaching stations to be located in media center

#### **Video tape recorders**

Accessible for experimentation Available in school district 1 per building

#### **Telelecture equipment**

Available within the school district .....

#### **Copying machines**

1 per center 1 per 30 teaching stations plus 1 1 per 20 teaching stations plus 1

#### **Duplicating machines**

1 per center 1 per 30 teaching stations plus 1 1 per 20 teaching stations plus 1

## Equipment Needed for Local Production

### Phase I \_\_\_\_\_

Dry mount press  
Tacking iron  
Large paper cutter  
Thermal copier  
Simple slide camera (Ektographic)  
Spirit duplicator  
Primary typewriter  
Tape splicer  
Manual lettering kit  
Portable chalk/bulletin board  
Film splicer, 8mm and 16mm  
Work table  
Drawing board  
Transparency production kits  
Tools for repair  
Storage and check-out facilities

### Phase II \_\_\_\_\_

Equipment in Phase I  
35mm camera  
Close-up lens  
Copy stand  
Polaroid camera  
35mm viewer box  
Mechanical lettering devices  
Film rewind  
Photocopy machine  
Slide file

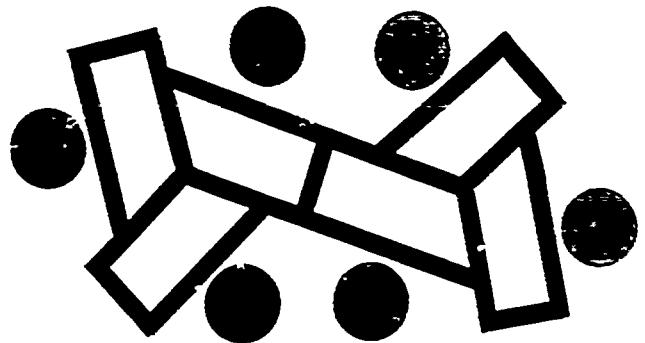

### Phase III \_\_\_\_\_

Equipment in Phases I and II  
8mm camera  
Darkroom and equipment  
Mimeograph

## Furniture

Standard library furniture from a reliable manufacturer should be considered for initial purchase. When facilities are expanded, additional furniture of the same style can be obtained, thus preserving a unified, pleasing appearance.

## Shelving

Width of section on centers ..... 3 feet

### Depth

Narrow .....	8 inches
Standard .....	10 inches
Oversize .....	12 inches

Thickness ..... 13/16 inch

Height ..... 5-6 feet

Height of counter section ..... 30-42 inches

Space between adjustable shelves ..... 10-10½ inches  
(Adjustable feature takes care of oversize books)

No trim on uprights, shelves, or cornices

### Periodical shelving

Depth of slanting shelves ..... 16 inches

Depth of shelves, straight across ..... 12 inches

Depth of storage shelves ..... 12-15 inches

### Picture book shelving

Depth of shelves ..... 12 inches

Space between adjustable shelves ..... 14-16 inches

¼ inch upright partitions 5 inches high and 7-8 inches apart on each shelf

### Phonograph record shelving

Depth of shelves ..... 16 inches

Space between adjustable shelves ..... 14-18 inches

¼ inch upright partitions 5-6 inches high and 2½-3 inches apart on each shelf

(Display bins, now frequently preferred, are not yet as fully standardized as shelving)

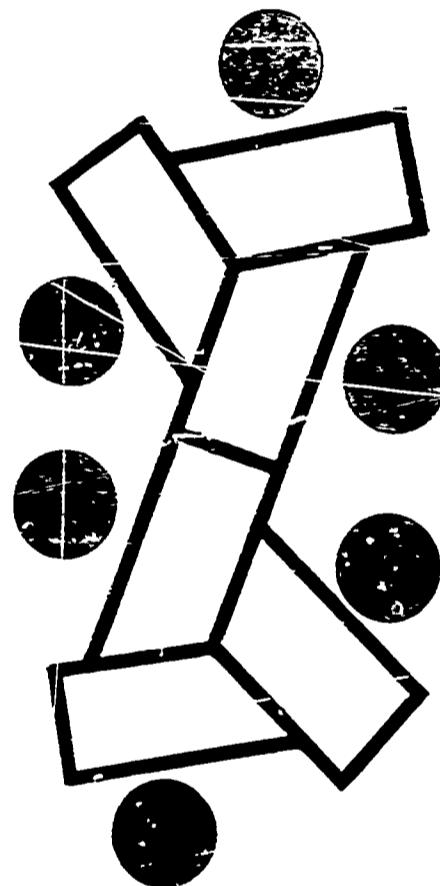

### Capacity estimates:

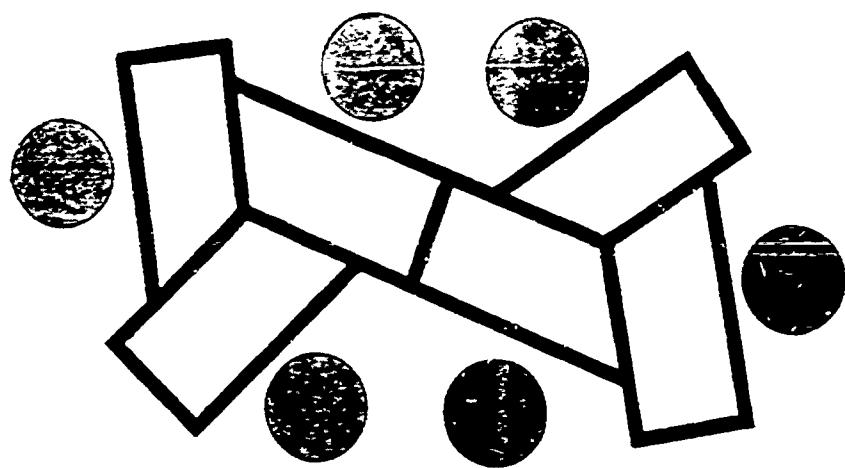

Number of books per 3-foot shelf when full:

Books of average size .....	30
-----------------------------	----

Reference books .....	18
-----------------------	----

Picture books (with dividers).....	60
------------------------------------	----

### Tables (Variety of heights)

Height .....	25-28 inches
Width .....	3 feet
Length .....	5-6 feet
Diameter (round) .....	4 feet

### Chairs (Variety of heights)

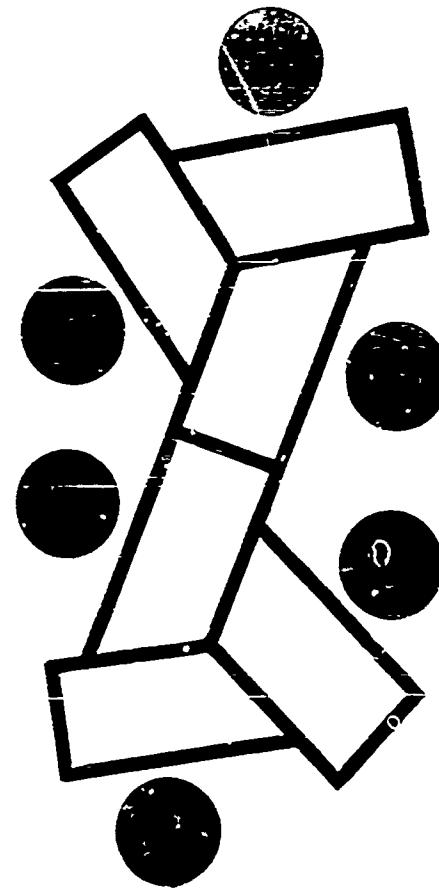

Height ..... 14-17 inches  
Chairs with curved backs and saddle seats are most comfortable.

### Files

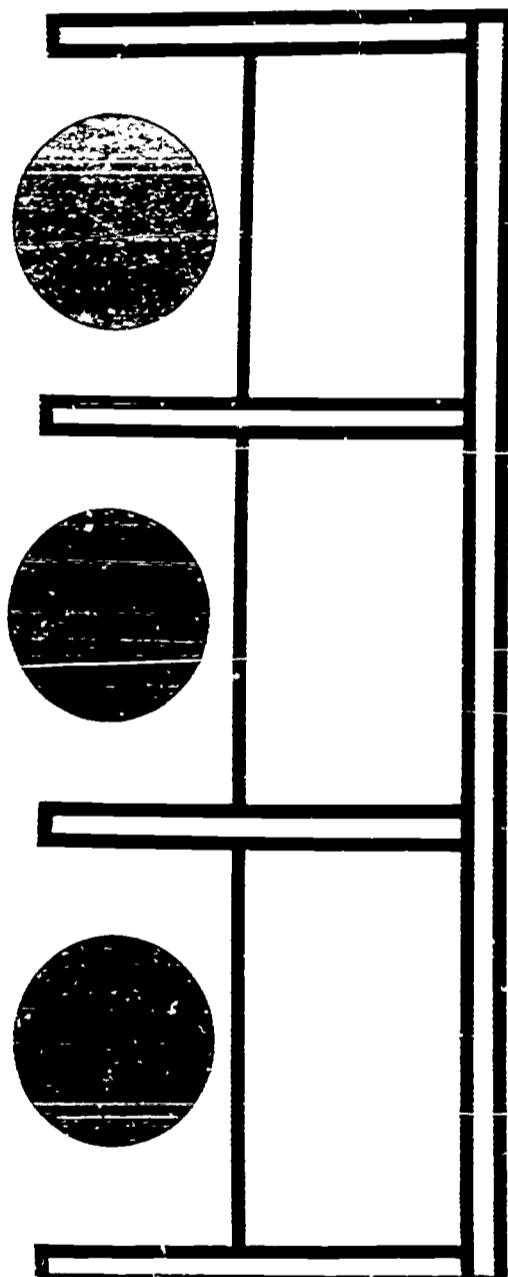

Phamphlets, clippings, small pictures and maps .....  
..... Legal size with hanging folders  
Other ..... Vary with size of material

### Audiovisual Materials & Equipment Storage

Storage units for these materials and equipment items are not as  
standardized as library furniture, so specifications are not included.
